

CS M148 Problem Set 1

Due Date: October 22, 2024 at 11:59 P.M.

This problem set must be your independent work. Collaboration and AI tools are not permitted.

In this assignment you will create a model to predict happiness.

1. Please obtain the data set for this problem set here:
[WHR2018Chapter2OnlineData.xls](#)
2. Please obtain the Jupyter notebook for this problem set here:
[CSM148_PS1_PredictingHappiness.ipynb](#)
3. Complete the questions and coding exercises in the Jupyter notebook.
4. When you have completed your work, you only need to submit your solutions in your Jupyter notebook file to Gradescope.

Please make sure you understand the code you submit. Your assignment Jupyter notebook will not be available to you during your quiz. However, you are permitted to have whatever notes you have made during your work.
